

## Assess Your Safe Driving Skills & Get Feedback to Improve

Car crashes are a leading cause of death and injury for new drivers. Ready-Assess™ was developed by scientists to help you be a driver safer. **In a 15-minute virtual driving experience**, you will drive through common and dangerous crash situations and be provided with:

- ✓ An assessment of your overall driving skill compared to other drivers your age.
- ✓ Feedback on how well you handled crash scenarios.
- ✓ Tips on how to avoid common driving mistakes you have made
- ✓ Links to free learning videos, personalized to your needs

*So much more  
than a video game*

## A Scientifically-Valid Assessment and Intervention

Ready-Assess™ combines a powerful diagnostic test with tools proven to help people become safer drivers. **While we recognize that Ready-Assess™ is not meant to feel exactly like driving a real car, we can safely expose you to dangerous driving situations that would be hard to do in a real car.**

Because of this, we can compare how you did to lots of other drivers who took this same test, and who may have had a similar experience with the test as you did.

## Backed by science

We don't make claims lightly. Over 100,000 people of all ages have taken Ready-Assess™. Using data from Ready-Assess™, we have proven that someone's score is strongly related to how they actually drive. You can learn more about this from our research partners at the National Institutes of Health (click link or scan QR code at right):

**Allen County Probate & Juvenile Courts: Judge Todd Kohrieser**

**Ready-Assess™ provides you with a *personalized* feedback report**  
 Work on becoming a safer driver while fulfilling your obligation to the court.  
 Our report will tell you:

**Your score:**

Your score is around the average. Out of 100 people who took the same test, 77 got a better score than you.

**Keep practicing** There are still many things you can improve to become a safer driver.

Your performance compared to other drivers your age.

How you handled common crash scenarios, and tips on areas for improvement.

Crash Scenario	Things To Think About.
<b>Following Vehicles</b> <i>Rear-end crash</i>  <b>NEEDS WORK</b>	You followed too closely and caused a crash outcome. <ul style="list-style-type: none"> <li>Practice keeping a space cushion of at least 3 seconds between you and vehicles in front of you.</li> </ul>
<b>Handling Curves</b> <i>Driving off the road</i>  <b>HANDLED WELL</b>	Good job! <ul style="list-style-type: none"> <li>Keep working on slowing your vehicle over time as you enter a curve.</li> <li>Keep your eyes on the road in front of you so you know how much of the curve is left.</li> </ul>
